

We share a passion for knowledge

Since our founding in 1965, we have worked closely with dental professionals. Together, we have a vision to bring healthy smiles for life by inspiring good oral health. TePe Share is a place to be informed, inspired and educated. For your personal development – and shared for the good of all.

TePe offers tailored lectures as well as our lecture package, TePe Clinic. TePe Clinic is a part of TePe Share

About TePe Clinic

TePe Clinic consists of three lectures; the first two are delivered on-site and the last one is a webinar. When participating in TePe Clinic, you will receive a certificate of attendance for each lecture. The lectures need to be attended in order. TePe Clinic is intended for students of dentistry or dental hygiene, however, not in their first year, because some clinical experience is to prefer.

The length of lecture 1 and 2 can be modified to fit particular needs and interests, but there is a required length of minimum 2 hours per lecture. The length of lecture 3, a webinar, is approximately 1,5 hours.

TePe Clinic Courses

Lecture 1

”Oral health by TePe”

In our first lecture, we will introduce you to the company TePe – our history, values and goals. We will let you know how we work with sustainability and with improving oral health on a global scale. Further, we will look at the prevalence and aetiology of gingivitis and periodontitis and pay much attention to prevention. In this lecture we will primarily focus on the existing scientific evidence for the benefits and importance of interdental cleaning and plaque control. You will become acquainted with TePe’s toothbrushes and interdental brushes. Hands-on training with our products is included.

After this lecture the participants will be able to

- Give examples of how TePe work with sustainability
- Understand the concept of non-renewable vs renewable resources
- Describe the prevalence and distribution of oral diseases globally
- Use and recommend the TePe toothbrushes and interdental cleaning products
- Give examples of the research behind different interdental cleaning products
- Understand the importance of optimal plaque removal

Lecture 2

“Better communication, healthier implants”

In our second lecture, we will focus on implant maintenance and the prevention of peri-implant diseases. We will also discuss oral care for certain patient groups, such as the elderly, and patients undergoing orthodontic treatment. The last part of the seminar will be dedicated to patient communication. You will learn about our special brushes and deepen your knowledge regarding our interdental brushes. The goal of this seminar is to increase awareness of the importance of individualised implant maintenance and create an understanding of how to form and maintain a healthy habit.

After this lecture the participants will be able to

- Use and recommend the TePe special brushes to different patient groups
- State the prevalence of peri-implant diseases, describe the disease etiology and disease risk factors
- Understand the importance of implant maintenance
- Understand the mechanisms that can change patients’ behaviours and create motivated patients

Lecture 3

“Healthy mouth, healthy body”

Our third seminar is arranged as a webinar. The topic of this lecture is the connection between oral health and systemic health. We will give you an overview of the solid scientific evidence of this connection. You will also get an update on our product portfolio. The goal of this seminar is a deeper understanding of how oral disease can have systemic effects, as well as thorough knowledge about TePe's products.

After this lecture the participants will be able to

- Explain the association between periodontal disease and systemic diseases
- Understand the scientifically proven links between periodontitis and different systemic diseases with specific focus on cardiovascular diseases, diabetes, adverse pregnancy outcomes, rheumatoid arthritis and cancer
- Define the opportunities that these links, as well as diet and exercise, give us to influence our advice on a healthy lifestyle and understand how this relates to good oral health
